ABOUT THE WORKSHOP

North-East region of India has rich biodiversity of life and natural resources. Modern agricultural practices have established a fact that excessive and indiscriminate use of synthetic inputs including insecticides, fungicides, weedicides, fertilizers etc., has endangered the biodiversity, bio security, natural resources and human well-being.

Also, there is urgent need to address the challenges of invasive insect pests such as Fall Army Worm in Maize, Rugose Spiralling Whitefly in Coconut, rice pests etc., through biological control as a component of IPM. To overcome the hazards associated with chemical pesticides, the use of biocontrol agent is increasingly being adopted. A great deal of knowledge has been gathered on the use of biocontrol agent for the management of pests and diseases. Biocontrol agents have offered some realistic alternatives to chemical pesticides when used as part of an ecologically based integrated pest management or area-wide pest management strategy.

Further, as a part of containment program of crop pests, some of the life stages of coleopteran crop pests can be utilized/promoted as human food and nutritional sources, keeping in view the food habits and cultures of the local groups and reduce the pestilence. Keeping in view the huge scope for growth of the biocontrol sector in NEH region, Central Agricultural University, Imphal and ICAR- NBAIR, Bengaluru are organizing a Workshop on “Biological control of insect-Pests of Crops in North-East Region of India” during **March 09-10, 2021**, under NEH program of ICAR- NBAIR, Bengaluru for resource personnel engaged in extension/developmental officers of agriculture KVK SMS of CAU/ICAR/SAUs and innovative farmers of North-East states of India.

SUBJECT AREA CONCERNED

- Cutting edge technology to workers already engaged in production of bio-agents or would like to learn the technology for possible future endeavours.
- State-of-the-art technology to the young entrepreneurs who wish to set up mass production units for biological control agents.
- Identification and biocontrol of rugose white fly.

- Identification and biocontrol of Fall Army Worm.
- Collection and utilization of edible insects.
- Biological control of insect pest of rice.
- Significance of homemade bio-pesticides.

EXHIBITION CUM PRESENTATION

During the Workshop, interested participants/ progressive/innovative farmers may present their innovations/success stories/practices through poster(s). Three (3) best posters of the farmers will be selected for award.

CAU AT A GLANCE

The Central Agricultural University (CAU), Imphal was established by an act of Parliament, The Central Agricultural University Act, 1992 (No. 40 of 1992) which came into effect on 26th January, 1993. The jurisdiction of the University extends to seven North- Eastern Hill States *viz.*, Arunachal Pradesh, Manipur, Meghalaya, Mizoram, Nagaland, Sikkim and Tripura, with headquarters at Imphal in Manipur. University established thirteen colleges and six Krishi Vigyan Kendras (KVKs) in the seven states of North East India and offers Undergraduate, Post graduate and Doctorate Degree Programmes in agriculture and allied sciences.

HOW TO REACH IMPHAL?

Imphal the capital of Manipur is well- connected by air and bus. It is well connected by road to Guwahati, via Dimapur and Kohima by NH-2 and to Silchar, Assam via Jiribam by NH 37. The venue is situated by the Uripok Kangchup Road near the Manipur Zoological Garden, about 7.2 km from the Imphal Central Point.
